

6510 EMERGENCY PULL STATION

Highly Visible

Reliable Operation

Key Reset

Deter Unauthorized Access

Medical Emergencies

Natural Disasters

Easily Recognized and Operated

The 6510 Series of Emergency Pull Stations provide conspicuous signalling or release in case of emergency. These easy to operate stations require a single pull action to actuate. Dual SPDT switches allow connection to an Alarm or Access control system while simultaneously breaking or making power to a lock or siren using the second set of contacts.

Multiple Applications

Ideal for use in Hospitals, Schools, Industrial facilities and Office buildings.

Use for Emergency Exit door release with Badge in/out Access control systems, or door interlock and Mantrap type systems.

The Wide variety of colors and text make these units suitable for signalling an alarm panel of any Natural Disaster, Hazmat incident, or Medical Emergency.

Deters unauthorized access, i.e. smoking in stairwells, and nuisance access to fire escapes.

Customized Labels

Custom labels may be ordered by contacting the factory. These would be special order and lead times will vary accordingly.

Easy Mounting & Wiring

Two mounting screws are all that's needed to surface mount the 6510.

The unit mounts to a standard single gang electrical box. Matching color back boxes are also available for surface mounting. Back boxes have conduit knock outs for easy wiring access.

Wiring is accomplished by utilizing the screw terminals on the back of the unit to connect to any system or device. All units are pre-wired, simply cut the wire not needed for a Normally Open or Normally closed contact.

Key Reset

Following actuation the pull station is reset by opening the front cover (with the key provided) and installing a new acrylic break rod. Close and relock the cover and the 6510 is restored and ready for the next emergency.

Options

A Piezo sounder may be attached to sound locally upon activation. Plexiglass anti tamper covers are also available for different applications to prevent false alarms.

6510 SERIES EMERGENCY PULL STATIONS

6510 DESCRIPTION:

Surface mounted Emergency Pull Station
 Ideal for emergency egress applications.
 Mounts on any single gang box or
 may be wall mounted utilizing appropriate wall
 anchors.

6510-S35 SPECIFICATIONS:

ELECTRICAL

Utilizes (2) SPDT Switches in Parallel
 Switch Rating 1Amp @ 30 VDC or VAC
 UL Listed for indoor or outdoor use.

PHYSICAL

5" Long x 2-5/8" Wide x 1" Deep
 Minimum clearance behind unit for wiring 1-1/2"
 All metal housing construction
 Large self clamping screw terminals mounted on a
 four point barrier strip
 Baked on powder coated finish
 Pressure sensitive Mylar labels with raised text
 Included key for Re-set and one plexiglass
 break rod, two mounting screws

OPERATION

Pulling on the T shaped handle activates both
 SPDT switches, and simultaneously breaks
 the plexiglass rod.
 To reset insert key and turn clockwise opening the
 front housing cover. Place pull handle back into
 position, insert new break rod, close cover and
 turn key counter clockwise to lock.
 Station is now reset.

(NOTE)

Break rods are not necessary to operate the unit,
 they are for visual indication of actuation.

ORDERING:

SPECIFY COLOR

Three colors are available specify as shown below.

BL= BLUE **6510/BL-S35**
BK= BLACK **6510/BK-S35**
YL= YELLOW **6510/YL-S35**

OPTIONS & ACCESSORIES:

OPTIONAL PIEZO

A continuous Piezo sounder may be mounted to the back of the unit, and
 can be wired to provide a local alarm when the station is activated.
 For this option suffix XCS example (6510/BL-S35XCS)

TAMPER COVER

A Plexiglass Anti Tamper cover may be mounted over the 6510 to protect it
 from being accidentally activated and prevents tampering with the device
 unless the spring loaded cover is lifted.

Text on cover reads "EMERGENCY EXIT" Order Part# 6510/COV

ALARM COVER

Same as above with Piezo sounder integrated in the unit. Lift the cover and a
 local Piezo activates to deter unnecessary activation of the 6510
 Order Part# 6510/COV/S

ALARM COVER WITH RELAY OUTPUT

SPDT Alarm Relay integrated in the unit. Lift the cover and a local Piezo acti-
 vates along with a relay output to deter unnecessary activation of the 6510
 Order Part# 6510/COV/SR

BACK BOXES

Surface mounted back boxes are available in colors to match the 6510 Pulls
 6510/BX-BL Blue metal back box with conduit knockouts
 6510/BX-BK Black metal back box with conduit knockouts
 6510/BX-YL Yellow metal back box with conduit knockouts

BREAK RODS

Pack of 12 Part# 6510/BR
