5279 Clean Wave Touchless Switch

Clean Wave Motion Activated Switches

Features:

Adjustable Detection Zone

Silent Activation

Selectable Timer or Toggle Mode

Adjustable LED Status Setting

Time Delay for Door Open

Durable IP54 Rated Design

Touchless Switch Activation

The 5279 series provides a versatile solution for Touchless Ingress/Egress. The 5279 Series utilizes Microwave Technology. The imbedded sensor picks up motion within a 4-inch range of the face plate and is adjustable up to 24 inches.

A simple wave of the hand activates the switch. No need to touch the switch; however, if inadvertently touched the sensor will pick up the motion before actual contact, resulting in normal operation

Environmentally Sanitary

The 5279 greatly decreases the potential to spread contagious diseases since no actual hand contact is required to activate. These Switches are often utilized with electronic locks and automatic door operators. Suitable for bathrooms, laboratories, hospitals, air locks, clean rooms or food service facilities.

Visible Status LED

The onboard LED located behind the face plate illuminates through to designate switch status. This configuration also allows easy wipe down of the faceplate.

The LED can be selected to be on during the normal standby mode and off when activated or the opposite, off in standby and on when activated

Convenient Wiring Hook-up

Switches are supplied standard with 10" leads for easy installation. The five color coded wires connect to the relay outputs and the power input.

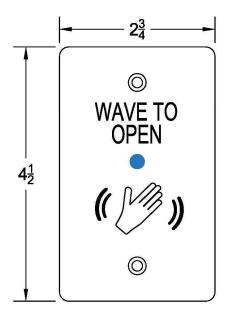

Access Control Compatible

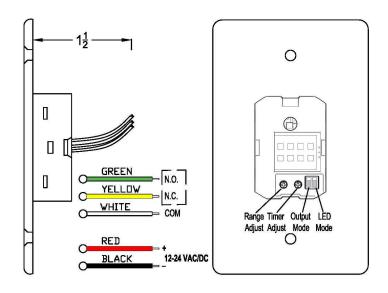

Suitable for use with card access systems or automatic door openers, the dry contact outputs can be wired to signal a door to unlock or a door opener to activate.

Product Specifications

Wiring Hook-up - Dimensions

Model Descriptions -

W5279-15XE1 – "WAVE TO OPEN"
1-Gang Switch Plate
4-1/2" x 2-3/4"
N.O. or N.C. contacts
with LED Indicator

D5279-15XE1 – "WAVE TO OPEN"
2-Gang Switch Plate
4-1/2" x 4-1/2"
N.O. or N.C. contacts
with LED Indicator

N5279-15XE1 – "WAVE TO OPEN"

Narrow Switch Plate

4-1/2" x 1-3/4"

N.O. or N.C. contacts

with LED Indicator

Specify Plate Color: W=White, B=Black, G=Gray Example: W5279-15XE1W= White plate

Electrical -

Input Voltage- 12-24 VAC/DC.

Relay rating - 1Amps @ 60VDC /125 VAC.

Operating Temperature- -4F to 131F

Current draw- <1.5W

Technology – Microwave Motion Sensor, Radiated frequency 24.125 GHz

Detection Range - 4 Inches to 24 Inches Adjustable Activation

Time Delay- Adjustable hold open from 0.5 to 30 seconds

Toggle Mode- Activates by motion and latches the relay, a second motion deactivates it. Selectable Status

LED -

OFF Standby Mode: Blue Illumination

Or

ON Trigger Mode: Blue Illumination

Specifications -

Unless noted otherwise, switch assemblies shall be flush wall mounted to standard, recess mounted, electrical boxes. Mounting screws will be phillips head or flat head Pin-in-Hex tamper resistant type stainless steel as required.

The face plate is constructed of high impact Thermoplastic with "WAVE TO OPEN" text and a hand icon printed on the face plate. with smooth edges on all four sides. Plate finish is available in White, Black or Grav

A blue status LED illuminates through the plate with selectable settings. Activation Range, Time delay and Toggle mode all are selectable.
